

2)FIBONACCI SERIES USING RAPTOR FLOWCHART

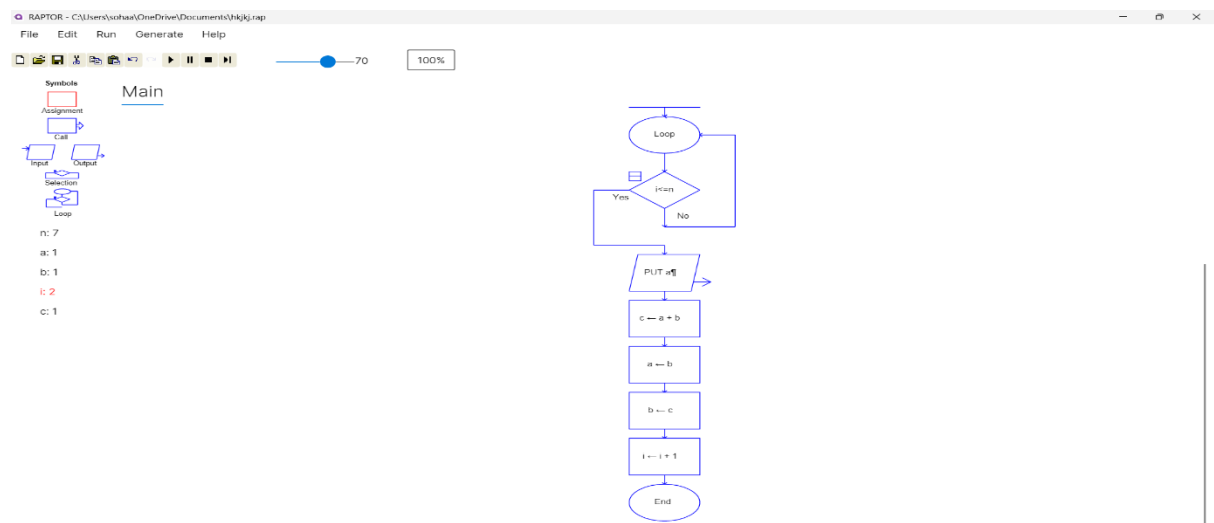

Aim

To develop a RAPTOR flowchart to generate the Fibonacci series up to n terms using a loop.

Algorithm

1. Start the program.
2. Input the number of terms n.
3. Initialize a = 1, b = 1, and i = 2.
4. Display a.
5. Repeat while $i \leq n$:
 - o Calculate $c = a + b$.
 - o Display c.
 - o Assign $a = b$.
 - o Assign $b = c$.
 - o Increment $i = i + 1$.
6. Stop the program.

Screenshot

Input

Enter the number of terms: 7

Output

Fibonacci Series:

1 1 2 3 5 8 13

Result

The RAPTOR flowchart was executed successfully, and the Fibonacci series for the given number of terms was generated and displayed correctly.
